Formatting page numbers in ETDS
Steps for configuring page numbers (in Microsoft Word):

1. Insert section break (next page) at the end of the Abstract page and the end of the preliminary section (before the first page of the manuscript).
2. Open the Header & Footer in the document.

- Navigate to the page directly after the abstract. Click the button that says “Link to Previous” in the Header & Footer Tools.
- Proceed to the first page of the main body (Introduction or Chapter 1). Press the “Link to Previous” button again.
3. Configure page numbers for each section:

- No page numbers on title or abstract pages
- Lower case roman numerals for preliminary pages
- Arabic numerals restarting at 1 at the beginning of the main body
